Research Interests	Heuristic search, metareasoning, motion planning, robotics.

Education

UNIVERSITY OF NEW HAMPSHIRE   Ph.D. in Computer Science, 2021
Dissertation: *Metareasoning for Heuristic Search Using Uncertainty.* Advisor: Prof. Wheeler Ruml.

SHANGHAI MARITIME UNIVERSITY   M.E. in Logistics Engineering, 2012
Thesis: *Planning for Yard Systems in Container Terminals using Genetic Mechanism-based Approach.* Advisor: Prof. Chengji Liang.

SHANGHAI MARITIME UNIVERSITY   B.E. in Logistics Engineering, 2010
Thesis: *SAIC Global Powertrain Development Process Lean Analysis.* Advisor: Prof. Ziqi Xu.

Professional Experience

ARGO AI
Roboticist   Feb 2022–present
- Build safety-critical self-driving systems.

UNIVERSITY OF NEW HAMPSHIRE
Graduate Research Assistant   September 2020–December 2021
- Build theoretical foundation for online planning. Seek answers for how to plan in an uncertain environment under time pressure.

Graduate Teaching Assistant   September 2015–May 2020
- Involved in creating assignments, exams and conducting recitation sessions for Algorithms (C), Intro to AI, Intro to Computer Science (Java, Python), Intro to Software Engineering, Intro to Computer Security, Database Programming (C#), Scripting Languages (Shell).

MOTIONAL
Research Intern   May 2020-August 2020
- Propose and develop a learning-based approach to enhance the planner. The feature was integrated to the next generation planner for autonomous vehicles.

COGNITIVE ASSISTIVE ROBOTICS LAB
Robotics Intern   May 2019-August 2019
- Build a smart home based service robot framework that can provide real-time Alzheimer's disease care.
- Build a AI planner based on ROSPlan that performs real-time online task planning.

REALTIME ROBOTICS
Robotics Intern   May 2018-August 2018
- Build a real-time planner for an autonomous vehicle that is able to safely drive in a crowded urban area. Successfully handed off to daily usage.
- Build a real-time planning framework that enabled handling a dynamic world online.

- Build a simulation environment to demostrate flagship product to major new customers.

SHANGHAI INTERNATIONAL PORT GROUP
Research Software Development Engineer   July 2012-August 2015
- Member of the team that design, build, and deploy a new automated container terminal operations management system, including algorithm development for the crane allocation and scheduling module.
- Help launch previous terminal operating management system.

ALCATEL-LUCENT
Software Engineer Intern   March 2011-September 2011
- Build and deploy a global electrical elements database, including web interface and database maintenance software.

Patents	Tianyi Gu, Bence Cserna, and Mochan Shrestha, "Driving Data Guided Spatial Planning", US patent pending, filed January, 2021.
Skills	*Programming Languages:* C++, Python. *Dev tools:* Linux, Git, Vim, tmux.
Awards	Shanghai Outstanding Graduate 2012
University Activities	Co-founder and Vice President of Artificial Intelligence Student Organization 2017–2021 Co-founder and Vice President of Shanghai Tongji Table Tennis Club 2005–2015
Citizenship	China. U.S.A visa: H1-b.
